ABOUT

Dynamic Web & Mobile App Developer with experience in building interactive, user-focused applications. Proficient in modern web and mobile technologies, with a strong focus on delivering high-quality, scalable solutions.

WORK EXPERIENCE

Hybrid Innovations

React-Native Developer Intern

PRESENT

Karachi, Pakistan

- Developing and deploying mobile applications, including "Scrap Cart" a mobile app for managing scrap inventory, incorporating real-time features and user-friendly UI. Used Firebase for database management.
- Created a appointment app with CRUD functionality and integrated user authentication using Firebase.
- Collaborated with teams to provide efficient and scalable solutions.

PROJECTS

Saylani Blood Bank

- A web platform where donors can register, donate blood, and receive free blood whenever needed, courtesy of SMIT Blood Bank. Built using Firebase for real-time data management and authentication, allowing users to securely connect with donors via provided contact numbers.

Personal Portfolio

- A modern, fully responsive portfolio website built using Next.js. Showcases my personal information, projects, and skills, designed with the latest libraries and best practices for an engaging user experience on any device.

ATM Project

- Developed an ATM system with TypeScript and Node.js, enabling secure account management and transaction processing.

OrebiShopping.com

- Developed an e-commerce website with React, Tailwindcss and Firebase enabling secure account with authentications with interactive user interface.
